SUMMERY

As a Junior Web Developer, I have been worked on different kinds of projects with JavaScript, ReactJS, ExpressJS, MongoDB, Laravel, MySQL and several CSS frameworks like Bootstrap, Tailwind, MaterialUI perfectly when needed.

SKILLS

Comfortable: Html, CSS, Bootstrap, Tailwind, JavaScript, ES6, React, React Hooks, React Route, Firebase Auth, SPA
Familiar: Node JS, Express JS, MongoDB, PHP, Laravel, MySQL, Material UI
Tools: VS Code, GitHub, GitBash, Chrome DEV Tools, Netlify, Firebase, Heroku, Figma

PROJECTS

Traveler Live Site Link | GitHub Client | GitHub Server
Overview:
- Tourists are able to know about the tour place before he books for any place. It is easy to choose where he/she wanted to visit.
- Tourists can book a place/destination where he wanted to visit. The amount for visiting a place was given for that a tourist can choose his/her place based on his/her budget.
- A tourist can delete his/her order if he/she will not agree to visit that place. After he/she login he/she will be able to do this.

Technology used: Bootstrap, React JS, Node JS, Express JS, MongoDB, Firebase, Heroku, Axios

Drone Website Live Site Link | GitHub Client | GitHub Server
Overview:
- This website is a Drone Niche website. Anyone can buy a product If he wants and cancel his order
- This Website has an admin and user role dashboard a admin can upload products and delete products
- An Admin Can delete any Order and approve the order to shipping
- A normal user can give a review and this review shows the Client site

Technology used: Bootstrap, React JS, Node JS, Express JS, MongoDB, Firebase, Heroku, Axios

Academic Website [Live Site Link](#) | [GitHub Client](#)

Overview:

- This website is an E-Learning Website. Anyone can buy courses online
